The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 2, 5, 16 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Hori et al or alternatively is rejected under 35 U.S.C. 103(a) as being obvious over Hori et al.

Hori et al. teach a circular shaped hollow structure comprising a seamless (jointless) metal substrate 2, having a thickness between 20 – 100  $\mu\text{m}$  (0.02 – 0.1 mm) and a Vicker's hardness between 50 and 1500 Hv (preferably 100 - 1200).

Specifically, Hori et al. does not teach the claimed details of manufacturing the photoreceptor's thin conductive support. However, it is well settled in patent

Art Unit: 2852

law that the patentability of the product does not depend on the method of production. See MPEP 2113.

2. Applicant's arguments filed 7/8/2003 have been fully considered but they are not persuasive.

Applicant must provide convincing evidence to overcome the above rejection as per MPEP 2113. Although applicant describes evidence which was intended to be submitted via a 132 affidavit, to date nothing has been received. See MPEP 716.01(c) for sections where attorney's remarks cannot be substituted for objective evidence.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will

Art Unit: 2852

the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
